8.3.1 – New Features

Documents

- Multi-file Attachments against a Document Record

Audit

- Permission Change – Audit Managers now remove Auditors and Auditees from an Audit

Documents

Multi-file Attachments against a Document Record

As part of this release, a Document record can now hold multiple attachments against it.

These attachments are added at record creation. You can use a mix of a URL and files.

POL-9	Multiple Attachment Document Feature

The Navigator has also been updated to take this into account with the introduction of a new icon portraying the fact that a record has multiple attachments against it.

 Multiple Attachment Document Feature POL-9 4 1.2 12 Aug 2021  

Any attachments that are added are also surfaced whenever a document record is referenced against something else, for example against an Audit or an Issue record.

Sharing documents via a hyperlink has also been updated to take this new feature into account.

Audit

Permission Change – Audit Managers now remove Auditors and Auditees to an Audit

A permission within the Audit module has been updated. Anyone set as a Manager for the Audit module can now remove Auditors and Auditees from an audit record.
